

Overall: We attempted to go for a bright color, or something that speaks fun. We went to a Navy dark blue, which doesn't speak bright nor fun. This is due to a limitation on wordpress theme selection. The Goal however, is to have a simple webpage that is easily navigable and manageable for the user at the end of the project. So far right now the images are hockey based, so the blue color scheme reflects around that choice. The prototype isn't too complex and feels quite simple to be managed. The cherry on top is that it is very minimal.

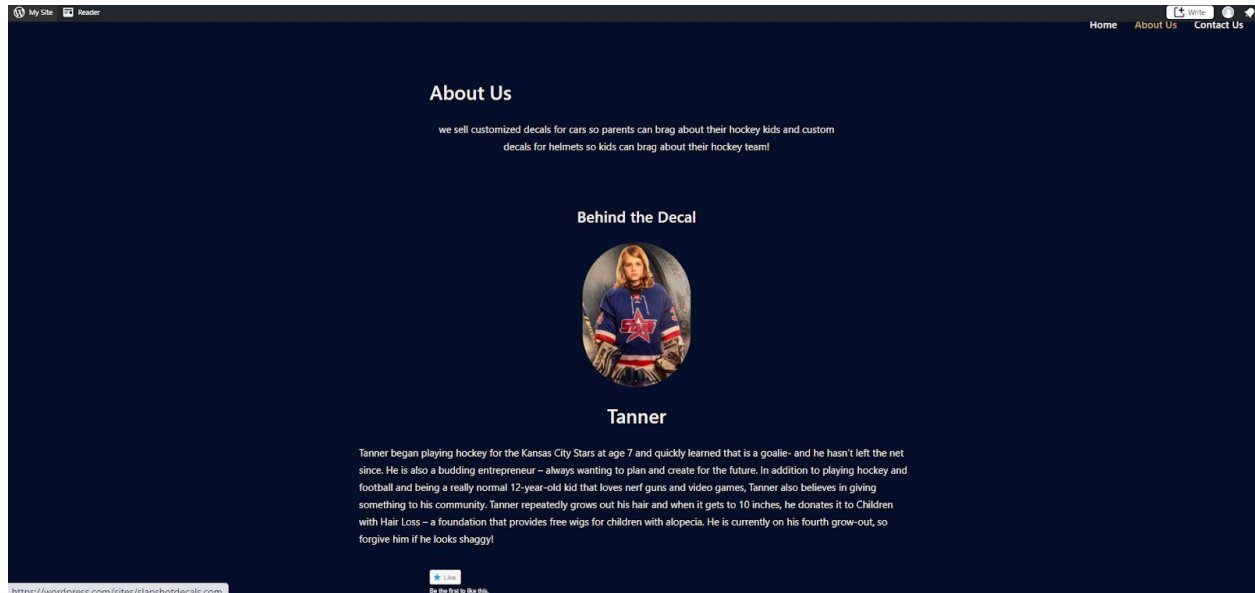

## Home Page/Gallery:

- Initially this is a separate Page but, due to the lack of content from the Gallery, it has then merged as to not have a lot of empty spaces.

## About Us:

- Little Information about the owner (Tanner).
- The background could've been more better, but with the limitations based on Wordpress.com we can only do what we can do.

## Contact us:

- If visitors are interested, they can reach out to Tanner through slaps shots email so that he can respond to them in a timely manner, or if interested in services they can also email him what they want.

This is due to limitations with what wordpress.com can do at a lower level plan. Nothing too advanced.
